

Corrections to Comprehensive Lactation Consultant Exam Review 4E

Question #	Page #	Error and correction
1.5	12	<b>The answer is a.</b> Correction: The answer is b.
1.13	3	The question asks about the most common implantation site, and the answer is correct. The reason that question exists is because OTHER implantation sites can affect the baby's position and the progress of labor, therefore affect breastfeeding. All questions must be relevant to lactation/breastfeeding. This question is marginal to lactation and unlikely to show up on the real exam.
1.30	14	<b>The answer is b....</b> Choices a <b>and b</b> are incorrect... Correction: Choices a and c are incorrect...
1.44	9	The answer is <b>d.</b> Correction: The answer is <b>b. During pregnancy, the body acquires the needed calcium through enhanced uptake. During lactation, calcium taken from the bones is replaced afterwards with no net decrease. Vitamin D aids calcium absorption, so assuring adequate vitamin D may be as important as calcium intake.</b>
2.57	29	You are assisting this family during the mother's <b>cesarean surgery.</b> Correction: <b>labor and birth.</b> (The photo is a vaginal birth; the question & answer are correct for both.)
